

The power of syndromic testing

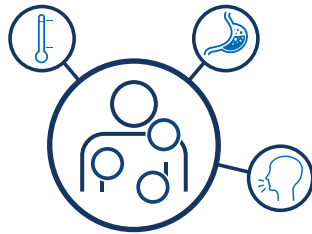

Fast and accurate answers
when it matters most

Sample to Insight

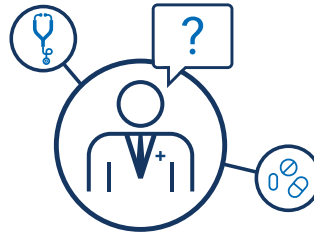

Syndromic solutions extend throughout your hospital system

Patient presents with a syndrome

Symptoms and signs are often nonspecific

Healthcare providers have difficulty selecting targeted therapy based on symptoms alone

Traditional laboratory methods are time consuming and have limited coverage

Support rapid treatment decisions for patients

Timely and accurate results
+
Comprehensive panels with 21-24 targets
=
A shortened period of symptoms and reduced hospital stay

Empower confident diagnosis and therapy selection

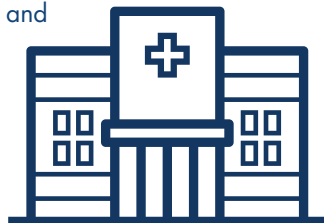

Comprehensive results in about an hour = support rapid decisions on treatments

Ct values and amplification curves = potential insights into coinfection and disease severity

Improve antimicrobial stewardship at your hospital

Accurate, comprehensive results = target pathogen with initial antimicrobial therapy = reducing readmission and preventing hospital acquired infections

Provide more clinical insights with a streamlined workflow

Less than a minute hands-on time
+
Ct values and amplification curves
=
efficient delivery of valuable results, including insights on coinfection and sample quality.

The next generation of syndromic insights

DiagCORE* is the next generation of syndromic insights you have been waiting for. Powered by proven QIAGEN sample and assay technologies, you can now confidently provide clinical insights to patients with the highest level of versatility.

Results in
about one
hour

Accurate and
comprehensive
results

Less than
1 minute
hands-on time

Ordering Information - Instrument

Product	Contents	Product code
DiagCORE Analyzer 1.0	Instrument consists of 1 each of both the Operational Module and Analytical Module.	100000
DiagCORE Analytical Module	1 each of module containing hardware and software for sample testing and analysis	110001
DiagCORE Operational Module	1 each of module to enable interaction with the Analyzer	110002

Ordering Information - Cartridge

Product	Contents	Product code
DiagCORE Respiratory Panel V2	6 individually packaged cartridges containing all reagents needed for sample preparation and multiplex RT-real time PCR plus internal control, including 6 transfer pipettes	210002
DiagCORE Gastrointestinal Panel V2	6 individually packaged cartridges containing all reagents needed for sample preparation and multiplex RT-real time PCR plus internal control, including 6 transfer pipettes	210004

DiagCORE is intended for in vitro diagnostic use in Europe.

*QIAstat-Dx coming soon. Currently available as DiagCORE. Not available in countries.
